Testimonial for JP Air Conditioning

To whom it may concern

It was a real delight to have Jacques Pretorius of JP Air Conditioning to organise our air conditioning as part of a renovation project at our factory during the early part of March 2014. JP Air Conditioning are one of only a few companies that I hold in this high regard from conception to completion.

The job was on budget, on schedule and followed up afterwards to ensure complete satisfaction.

They liaised at all times with my builders to ensure that the job was implemented on time. I have no hesitation whatsoever of recommending this highly professional company.
