

# Build API, Approaches and GraphQL: Live Ether with Pavel Torobovaya

## Get professional assistance with your programming assignment

What you need to know about building an API? What approaches exist at the moment? What problems solves graphql and where does it fit?

Let's talk about it on July 27 at 19:00 Moscow time with Pavel Churchwog, architect information systems in PS.KZ. Interview moderates CEO Hexlet Cyril Mokivnin. We will deal with scratch, and, in addition to answers to questions about the design of schemes and design patterns, we will show interesting cases and code examples.

Link to the broadcast: <https://youtu.be/gm7m91pz0nm> The entry will be available on the same link. During the entire ether to the speaker, questions are accepted in Youtube Chat.

### About Speaker

Pavel Chiefs - GraphQL Evangelist, Developer of Internet Products, Opensource Maintainer. Made more than 15 graphql reports and spent more than 5 workshops both on the client and the server. In web development since 2001. It has extensive practical knowledge of backend, frontend, administration and construction of architecture. In 2016, began developing a GraphQL-compose (GraphQL-scheme generator). I wrote a lot of graphql material in Russian. In 2019, began to form a Best Practice on the design of GraphQL-schemes.
